

AB1305 Compliance

Project Name: TIST Program in Uganda, VCS-CCB 010

Project ID: VCS2339

Project Standard: Verra Carbon Standard

Section: 44475 Specific Language		
a) Details regarding the applicable carbon offset project, including the following information:		
1)	Specific protocol used to estimate emissions reductions or removal benefits:	AR-AMS0007 CDM AR-AMS0001 Version 06: Simplified baseline and monitoring methodologies for small-scale A/R CDM project activities implemented on grasslands or croplands with limited displacement of pre-project activities. The following tools were also used: Procedures for the demonstration of land eligibility, AR-AMS0001, Appendix A, and Procedures for the assessment of additionality, AR-AMS0001, Appendix B.
2)	The location of the offset project site	Uganda
3)	The project timeline:	February 1st, 2015 – February 1st, 2075, 60 years
4)	The date when the project started or will start:	February 1, 2015
5)	The date and quantities when a specified quantity of emissions reductions or removals started or will start:	Vintage: February 1st, 2015 – February 1st, 2020 173,000
6)	Type of project, including whether the offsets from the project are derived from a carbon removal, an avoided emission, or the case of a project with both carbon removals and avoided emissions, the breakdown of offsets from each	Afforestation, Reforestation and Revegetation Removal
7)	Whether the project meets any standards established by law or by a nonprofit entity	Yes, VERRA
8)	The durability period for any project that the seller knows or should know that the durability of the project's greenhouse gas reductions or greenhouse gas removal enhancements is less than the atmospheric lifetime of carbon dioxide emissions	The project standard requires a minimum risk rating of 10% that has been applied by the project. This approach is conservative and has been verified.

9)	Whether there is independent expert or third-party validation or verification of the project attributes	Yes, validation and verification
10)	Emissions reduced or carbon removed on an annual basis	87,857 mtCO2e/year estimate
b) Details regarding accountability measure if a project is not completed or does not meet the project emissions reductions or removal benefits, including but not limited to, details regarding what action the entity, either directly or by contractual obligation shall take under both of the following circumstances:		
1)	If carbon storage projects are reversed	No quantification of reversals, trees are planted and emission reductions calculated from the number of trees surviving. https://cdm.unfccc.int/UserManagement/FileStorage/MM241GHZLVUNN23FL88CG14XJU3TSK
2)	If future emissions reductions do not materialize	These credits are Ex-Post not Ex-Ante
c) Pertinent data and calculation methods needed to reproduce and verify the number of emissions reductions issued using the protocol		The data and calculation methods can be reproduced and verified by using the protocol outlined in the following monitoring report pg 35: https://registry.verra.org/mymodule/ProjectDoc/Project_ViewFile.asp?FileID=49453&IDKEY=3903q4jsafkasjfu90amnmasdfkaidflnm9348r09dmfasdfs68195687 & verification report page 21 https://registry.verra.org/mymodule/ProjectDoc/Project_ViewFile.asp?FileID=55234&IDKEY=f097809fDSLkjf09rndaSufd098asodfjlkduf09nm23mrrn87k7616766 & methodology: https://cdm.unfccc.int/UserManagement/FileStorage/7MC7B9XAQK8P6NFRSIGLWHV40EY23D ER calculation - PA summary: "TIST KE PD-VCS-005o App14a Verif 03 Monitor Data 200522-2.xlsx" ; "TIST KE PD-VCS-005o App14b Verif 03 Monitor Data 200522.xlsx" ; "TIST KE PD-VCS-005o App14c Verif 03 Monitor Data 200522.xlsx"
Section: 44475.1 Specific Language		
a)	The Name of the business entity selling the offset	Cool Effect, Inc.
	& Offset Registry	Verra

b)	Project Identification Number	VCS2339
c)	The project name as listed on the registry	TIST Program in Uganda, VCS-CCB 010
d)	The offset project type, including whether the offsets purchased were derived from a carbon removal, an avoided emission, or a combination of both, and site location.	Carbon removal Site location noted above
e)	The specific protocol used to estimate emission reductions or removal benefits	Simplified baseline and monitoring methodologies for small-scale A/R CDM project activities implemented on grasslands or croplands with limited displacement of pre-project activities https://cdm.unfccc.int/UserManagement/FileStorage/7MCTB9XAQK8P6NFRSIGLWHV4OEY23D
f)	Whether there is independent third-party verification of company data and claims listed	Yes, all documentation of verification and validation can be found here: https://registry.verra.org/app/projectDetail/VCS/2339
